

# How much energy can you save?

Typically 60% of your lighting energy, as well as 20% of your heating and cooling energy.

### Kay + Sons light management savings recipe

Fine tuning lights	20% reduction
Vacancy sensing	15% reduction
Personal control	10% reduction
Daylight harvesting <sup>1</sup>	15% reduction

**Total lighting savings 60% energy savings**

lighting energy savings

### Kay + Sons heating and cooling energy savings recipe

Dimming <sup>2</sup>	10% reduction
Controllable window shades <sup>3</sup>	10% reduction

**Total heating and cooling savings 20% energy savings**

HVAC energy savings

- 1 Optimized by controllable window shades
- 2 Reducing light levels reduces heat in the space, which decreases the power use of your AC system. Typically every 3-Watt reduction in lighting power eliminates 1-Watt of cooling power.
- 3 Building Simulation by Professor Ali Malikawi University of Pennsylvania.

**MOHAWK** wind power

Printed on Mohawk Options, Smooth, 100# text, 100% PC (post consumer) white. Mohawk Options is GreenSeal certified, manufactured with renewable wind-generated energy, and certified through the Green-e program.
